## About Eurasia Trading Company:

The Eurasia brand is one of the leading companies in the production and distribution of various architectural and industrial paints. With over 10 years of experience in the paint industry, this company has been able to establish a reputable position in domestic and international markets by providing high-quality products and special services to customers. Eurasia brand uses the best raw materials and modern technologies to produce its products. The paints offered by this company not only have high quality and exceptional durability but are also guaranteed to provide the best results for your projects.

**Choosing the right color based on the environment and desired goal can have a significant impact on the attractiveness and success of a product or space. The Eurasia Trading Group, in collaboration with the best manufacturers in various fields and adhering to international standards and regulations, aims to offer the highest quality products in the global market. The export goals of these products include expanding target markets, increasing market share, and improving relative competitiveness against competitors. With the aim of providing sales and after-sales services tailored to customer needs, the company introduces and offers excellent and high-quality products and offers a unique variety of industrial and architectural paints in various sizes and colors, in custom volumes, at the most competitive prices to its special customers worldwide.**

## **Gloss Paint:**

Alkyd oil-based paint is formulated using special alkyd resin and the latest formulation available in the paint industry. This product offers suitable drying time, glossiness, adhesion, and coverage power, as well as good resistance to weather conditions and compatibility with various environments.

The types of oil-based paints include:

- Glossy oil-based paint
- Semi-gloss oil-based paint
- Matte oil-based paint
- Metallic oil-based paint

All products are available in various sizes for packaging, including:

- Quart (25 pieces)
- Quart (12 pieces)
- Gallon (4 pieces)
- tin (1 piece)

## Acrylic Paint:

Acrylic paint is formulated using high-quality water-based acrylic resins and is suitable for quick, beautiful, and durable coloring of all surfaces such as plaster, cement, concrete, brick, asbestos cement slate, and wood both indoors and outdoors. Some of the key features of this paint include washability, excellent coverage power, fast drying time, ease of application, water dilutability, no unpleasant odor, abrasion resistance, dust repellence, etc.

The types of acrylic paints include:

- Glossy acrylic paint
- Semi-gloss acrylic paint
- Matte acrylic paint
- Special facade acrylic paint

All products are available in various sizes for packaging, including:

- Quart (6 pieces)
- Gallon (4 pieces)
- 2.5 gallons
- 5 gallons

## Plastic Paint:

Plastic paint is formulated based on Polyvinyl Acetate resin. This group of products is used for painting all surfaces (plaster, cement, concrete, slate, and wooden) inside buildings. Some key advantages of this paint include suitable coverage power, fast drying time, proper brushability, water dilutability, excellent adhesion, ease of application, lack of unpleasant odor, and environmental compatibility.

Types of plastic paints include:

- Matte all plastic paint
- Semi-matte plastic paint

Various packaging sizes available, including:

- Quart (6 pieces)
- Gallon (4 pieces)
- 2.5 gallons
- 5 gallons

## Shed Paint:

Shed paint, long-lasting with suitable coverage power and exceptional weather resistance, is the best choice for protective coating of metal structures to increase their durability and for indoor and outdoor warehouse spaces. This product is used for purposes such as fencing, columns, gutters, etc. In most cases, it can be used as an anti-corrosion primer for steel structures in warehouses.

Types of shed paints include:

- Rust-resistant epoxy shed paint
- Glossy alkyd shed paint

Packaging:

tin (1 piece)

## Exterior Paint:

Exterior paint refers to a group of products manufactured for the facades of buildings and structures, considering the various weather conditions of the country and using very high-quality raw materials. This group of products has exceptional adhesion to various cement, concrete, and plaster surfaces, and some of their key features include high coverage, exceptional weather resistance, breathability, and suitable moisture resistance.

Types of acrylic exterior paint include:

- Breathable Acrylic Exterior Paint
- Elastomeric Acrylic Exterior Paint
- Textured Acrylic Exterior Paint

Packaging types (in cartons): 20 kg tin (1 piece)

## **Pool Paint:**

Pool paint is formulated and produced based on vinyl chloride resins and, in addition to high adhesion to concrete, brick, and cement surfaces, it also has very high resistance to positive pressure and moisture. This paint is recommended for coloring swimming pools and freshwater reservoirs. Some features of this product include water resistance, suitable drying time, excellent covering power, resistance to abrasion, impact, sunlight, and ultraviolet light.

Types of pool paint include:

- Solvent-Based Pool Paint
- Acrylic Pool Paint
- Polymer Pool Paint
- Epoxy Pool Paint
- Nano Pool Paint

Packaging types (number per carton): Gallon (4 pieces), tin (1 piece)

## **Polyurethane Paint:**

Polyurethane paint is one of the high-quality industrial paint options that, with its polymer structure and high resistance, is considered a prominent choice for coating various surfaces in many industries, including aerospace, marine, industrial equipment, metal roofs, and floor coatings. It garners a lot of attention for its durability and resilience.

Types of polyurethane paint include:

- Matte Polyurethane Paint
- Glossy Polyurethane Paint
- Semi-Gloss Polyurethane Paint

Packaging types (number per carton): Gallon (4 pieces), tin (1 piece)

## **Car Paint:**

Car paint is a crucial factor in the beauty and attractiveness of vehicles. Choosing the right color for your car can have a significant impact on its overall appeal.

Types of car paint include:

- Car Acrylic Paint
- Metallic Car Paint
- Gloss Car Paint
- Basecoat Car Paint
- Two-Part Car Paint
- Pearl Car Paint
- Cellulose Car Paint

Packaging types (number per carton): Gallon (4 pieces), tin (1 piece)

## Traffic Paint:

Traffic paints are essential products in the industrial sector used to create signs and necessary guidelines for controlling and directing traffic on roads and streets. These paints are produced from acrylic thermoplastic resins and alkyd-chlorinated rubber, which have specific properties to withstand weather conditions and street pressures. The use of traffic paints plays a vital role in enhancing safety and reducing driving accidents by providing an effective and reliable method to establish order and discipline in traffic.

Types of traffic paints include:

### 1. Cold Traffic Paints:

- Chlorinated Rubber-based Traffic Paint
- Acrylic Thermoplastic Traffic Paint
- Two-Part Acrylic Traffic Paint

### 2. Warm Traffic Paints:

- Hydrocarbon-based Warm Traffic Paint

Packaging types (number per carton): Gallon (4 pieces), 20 kg tin (1 piece)

## **Kerb Marking Paint:**

Kerb Marking Paint is an intelligent choice for coloring urban kerbs, not only enhancing their beauty but also providing greater durability and longevity compared to other paints. These paints are made of polyolefin and polyurethane and are manufactured using advanced technologies to resist weather conditions and external factors effectively.

Types of Kerb Marking Paint include:

- **Acrylic Kerb Marking Paint (Water-based):** Produced based on acrylic resins and diluted with water to reduce viscosity, this product has less environmental stress and provides better coverage in humid areas.
- **Solvent-based Kerb Marking Paint:** Specifically designed for concrete surfaces, particularly urban kerbs and boulevards, all components in the formulation of this paint, including resins, pigments, and fillers, are highly resistant to alkaline concrete environments, providing long-term protection for these surfaces.

**Packaging types (number per carton):** Gallon (4 pieces), 20 kg tin (1 piece)
